Contents of Volume 126

Number 1, 7 May 1987

HINES, W. G. S., Can and Will a Sexual Diploid Population Evolve to an ESS: The Multi-locus Linkage Equilibrium Case 1

HSU, J-P., A Monte-Carlo Simulation of Bacterial Adhesion . . . 7

SCHNEEWEISS, U., SCHMIDT, W. and FABRICIUS, E.-M., Antibacterial Immunity and Its Modeling in Experimental Tumor Tetanus and Wound Tetanus of the Mouse 15

PUGLIESE, A., Optimal Resource Allocation and Optimal Size in Perennial Herbs 33

ROUHANI, S. and BARTON, N. H., The Probability of Peak Shifts in a Founder Population 51

MEINHARDT, H. and KLINGLER, M., A Model for Pattern Formation on the Shells of Molluscs 63

MENÉNDEZ-ARIAS, L., TURNAY, J., GAVILANES, J. G. and RODRÍGUEZ, R., Relationship between Hydropathic Variability and Functional Properties of α-Lactalbumins and Type c Lysozymes 91

SPEAKMAN, J. R., Calculation of CO_2 Production in Doubly-labelled Water Studies 101

IPIÑA, S. L., A Multivariate Phenetic Approach to Neuronal Nuclei Resemblances across Species, with Examples from Three Regions of Cerebral Cortex of a Mammal, a Bird and a Reptile 105

LETTER TO THE EDITOR

LYSTER, W. R. and LLOYD, M. M., Contrasting Sex Ratios in Siblings of Male and Female Left-handed Persons 125

Number 2, 21 May 1987

CHELA-FLORES, J., Towards a Collective Biology of the Gene . . . 127

TEMME, D. H. and CHARNOV, E. L., Brood Size Adjustment in Birds: Economical Tracking in a Temporally Varying Environment 137

WOHLGEMUTH, A. and DUBEY, D. P., The Impact of Symbolism on Immunogenetics: An Application to HLA 149

BERDING, C., KEYMER, A. E., MURRAY, J. D. and SLATER, A. F. G., The Population Dynamics of Acquired Immunity to Helminth Infection: Experimental and Natural Transmission 167

BARDSLEY, W. G. and MCGINLAY, P. B., The Use of Non-linear Regression Analysis and the F Test for Model Discrimination with Dose–Response Curves and Ligand Binding Data 183

MCARTHUR, A. J., Thermal Interaction Between Animal and Microclimate: a Comprehensive Model 203

LETTERS TO THE EDITOR

VLAD, M. O., The Occurrence of Time-persistent Distribution Functions in Structured Population Dynamics 239

MERCOLA, D., The Proto-oncogene c-*fos* Encodes a Potential Regulatory Site that is Disrupted by Viral Transduction 243

BRENDEL, V. and PERELSON, A. S., A Note on Stochastic Models for Bacterial Adhesion 247

MÜLLER-HEROLD, U., LUTZ, H. U. and KEDEM, O., Quantum Mechanical Coherence in Red Blood Cells: No Experimental Evidence . 251

Number 3, 7 June 1987

LIAO, J. C. and LIGHTFOOT, E. N. JR, Extending the Quasi-Steady State Concept to Analysis of Metabolic Networks 253

URUSHIBARA, S., KAWATO, M., NAKAZAWA, K. and SUZUKI, R., Simulation Analysis of Conduction of Excitation in the Atrioventricular Node . 275

HOUSTON, A. I. and SUMIDA, B. H., Learning Rules, Matching and Frequency Dependence 289

FISHMAN, S., EREZ, A. and COUVILLON, G. A., The Temperature Dependence of Dormancy Breaking in Plants: Computer Simulation of Processes Studied Under Controlled Temperatures 309

GLAZIER, D. S., Towards a Predictive Theory of Speciation: The Ecology of Isolate Selection 323

CZERKAWSKI, J. W., Reassessment of the Contribution of Protozoa to the Microbial Protein Supply to the Host Ruminant Animal 335

MULLER, M., Optimization Principles Applied to the Mechanism of Neurocranium Levation and Mouth Bottom Depression in Bony Fishes (Halecostomi) 343

LETTERS TO THE EDITOR

KENDAL, W. S. and FROST, P., Constancy of Genomic Instability in Tumor Progression 369

BUCHER, P. and TRIFONOV, E. N., On Nussinov's Compilation of Eukaryotic Transcription Initiation Sites 373

BERNSTEIN, M. E., Does Variation in the Testosterone Level of the Seminal Plasma Affect the Primary Sex Ratio? 377

DAVISON, J. A., Semi-Meiosis and Evolution: A Response 379

Number 4, 21 June 1987

MINI REVIEW

TYSON, J. J., Size Control of Cell Division 381

CRESSMAN, R. and DASH, A. T., Density Dependence and Evolutionary Stable Strategies 393

FISHER, D. S., BURNS, J. C. and PONDS, K. R., Modeling *Ad Libitum* Dry Matter Intake by Ruminants as Regulated by Distension and Chemostatic Feedbacks 407

GORDON, R., A Retaliatory Role for Algal Projectiles, with Implications for the Mechanochemistry of Diatom Gliding Motility 419

COLACINO, J. M., BRANNAN, J. R. and FIELDS, M. A., A Model for Oxygen Storage by Haemoglobin 437

HSU, J.-P., Transient Analysis of Bacterial Adhesion 449

BASS, L., ROBERTS, M. S. and ROBINSON, D. P., On the Relation Between Extended Forms of the Sinusoidal Perfusion and of the Convection–Dispersion Models of Hepatic Elimination 457

LANDAU, G. M., VISHKIN, U. and NUSSINOV, R., An Efficient String Matching Algorithm with K Substitutions for Nucleotide and Amino Acid Sequences 483

BAJAJ, J. S., RAO, G. S., RAO, J. S. and KHARDORI, R., A Mathematical Model for Insulin Kinetics and its Application to Protein-deficient (Malnutrition-related) Diabetes Mellitus (PDDM) 491

LETTER TO THE EDITOR

KACSER, H., Dominance Not Inevitable But Very Likely 505

Index to Volume 126

Adhesion, bacterial, a Monte-Carlo simulation of, 7
Adhesion, bacterial, a note on stochastic models for (letter), 247
Adhesion, bacterial, transient analysis of, 449
Algal projectiles, a retaliatory role for, with implications for the mechanochemistry of diatom gliding motility, 419
Amino acid sequences, an efficient string matching algorithm with K substitutions for, 483
Animal and microclimate, thermal interaction between; a comprehensive model, 203
Animal, ruminant, host, reassessment of the contribution of protozoa to the microbial protein supply to, 335
Antibacterial immunity and its modeling in experimental tumor tetanus and wound tetanus of the mouse, 15
Atrioventricular node, simulation analysis of conduction of excitation in, 275

Bacterial adhesion, a Monte-Carlo simulation of, 7
Bacterial adhesion, a note on stochastic models for (letter), 247
Bacterial adhesion, transient analysis of, 449
BAJAJ, J. S., RAO, G. S., RAO, J. S. and KHARDORI, R., A mathematical model for insulin kinetics and its application to protein-deficient (malnutrition-related) diabetes mellitus (PDDM), 491
BARDSLEY, W. G. and MCGINLAY, P. B., The use of non-linear regression analysis and the F test for model discrimination with dose-response curves and ligand binding data, 183
BARTON, N. H. (see ROUHANI, S.), 51
BASS, L., ROBERTS, M. S. and ROBINSON, D. P., On the relation between extended forms of the sinusoidal perfusion and of the convection-dispersion models of hepatic elimination, 457
BERDING, C., KEYMER, A. E., MURRAY, J. D. and SLATER, A. F. G., The population dynamics of acquired immunity to helminth infection: experimental and natural transmission, 167
BERNSTEIN, M. E., Does variation in the testosterone level of the seminal plasma affect the primary sex ratio? (letter), 377
Biology, collective, of the gene, 127
Bird, cerebral cortex of, and neuronal nuclei resemblances across species, 105
Birds, brood size adjustment in; economical tracking in a temporally varying environment, 137
BRANNAN, J. R. (see COLACINO, J. M.), 437
BRENDEL, V. and PERELSON, A. S., A note on stochastic models for bacterial adhesion (letter), 247
Brood size adjustment in birds: economical tracking in a temporally varying environment, 137
BUCHER, P. and TRIFONOV, E. N., On Nussinov's compilation of eukaryotic transcription initiation sites (letter), 373
BURNS, J. C. (see FISCHER, D. S.), 407

CO_2 production in doubly-labelled water studies, calculation of, 101
Cell division, size control of, 381
Cells, blood, red, quantum mechanical coherence in; no experimental evidence (letter), 251
Cerebral cortex of a mammal, a bird and a reptile, and neuronal nuclei resemblances across species, 105
c-*fos* proton-oncogene encodes a potential regulatory site that is disrupted by viral transduction (letter), 243

CHARNOV, E. L. (see TEMME, D. H.), 137
CHELA-FLORES, J., Towards a collective biology of the gene, 127
Chemostatic feedbacks, modeling *ad libitum* dry matter intake by ruminants as regulated by distension and, 407
COLACINO, J. M., BRANNAN, J. R. and FIELDS, M. A., A model for oxygen storage by haemoglobin, 437
Conduction of excitation in the atrioventricular node, simulation analysis of, 275
Convection-dispersion models of hepatic elimination, on the relation between extended forms of sinusoidal perfusion and of, 457
COUVILLON, G. A. (see FISHMAN, S.), 309
CRESSMAN, R. and DASH, A. T., Density dependence and evolutionary stable strategies, 393
CZERKAWSKI, J. W., Reassessment of the contribution of protozoa to the microbial protein supply to the host ruminant animal, 335

DASH, A. T. (see CRESSMAN, R.), 393
DAVISON, J. A., Semi-meiosis and evolution: a response (letter), 379
Density dependence and evolutionary stable strategies, 393
Diabetes mellitus, protein-deficient (malnutrition-related), a mathematical model for insulin kinetics and its application to, 491
Diatom gliding motility, mechanochemistry and implications of a retaliatory role for algal projections, 419
Diploid sexual population, can and will it evolve to an ESS: the multi-locus linkage equilibrium case, 1
Distribution functions, time-persistent, occurrence in structured population dynamics (letter), 239
Dominance not inevitable but very likely (letter), 505
Dormancy breaking in plants, temperature dependence of; computer simulation of processes studied under controlled temperatures, 309
Dose-response curves and ligand binding data, the use of non-linear regression analysis and the F test for model discrimination with, 183
Dry matter *ad libitum* intake by ruminants as regulated by distension and chemostatic feedbacks, modeling of, 407
DUBEY, D. P. (see WOHLGEMUTH, A.), 149
Dynamics, population, of acquired immunity to helminth infection; experimental and natural transmission, 167
Dynamics, population, structured, the occurrence of time-persistent distribution functions in (letter), 239

Ecology of isolate selection; towards a predictive theory of speciation, 323
Environment, temporally varying, economical tracking in; brood size adjustment in birds, 137
EREZ, A. (see FISHMAN, S.), 309
Eukaryotic transcription initiation sites, on Nussinov's compilation of (letter), 373
Evolution: can and will a sexual diploid population evolve to an ESS; the multi-locus linkage equilibrium case, 1
Evolution and semi-meiosis: a response (letter), 379
Evolutionary stable strategies, and density dependence, 393
Excitation conduction in the atrioventricular node, simulation analysis of, 275

F test and non-linear regression analysis, use for model discrimination with dose-response curves and ligand binding data, 183
FABRICIUS, E.-M. (see SCHNEEWEISS, U.), 15
FIELDS, M. A. (see COLACINO, J. M.), 437
FISHER, D. S., BURNS, J. C. and PONDS, K. R., Modeling *ad libitum* dry matter intake by ruminants as regulated by distension and chemostatic feedbacks, 407

Fishes, bony, (Halecostomi), optimization principles applied to the mechanism of neurocranium levation and mouth bottom depression in, 343
FISHMAN, S., EREZ, A. and COUVILLON, G. A., The temperature dependence of dormancy breaking in plants: computer simulation of processes studied under controlled temperatures, 309
FROST, P. (see KENDAL, W. S.), 369
Functional properties and hydropathic variability of α-lactalbumins and type c lysozymes, relationship between, 91

GAVILANES, J. G. (see MENÉNDEZ-ARIAS, L.), 91
Gene, towards a collective biology of, 127
Genomic instability in tumor progression, constancy of (letter), 369
GLAZIER, D. S., Towards a predictive theory of speciation: the ecology of isolate selection, 323
GORDON, R., A retaliatory role for algal projectiles, with implications for the mechanochemistry of diatom gliding motility, 419

Haemoglobin, a model for oxygen storage by, 437
Halecostomi, bony fishes, optimization principles applied to the mechanism of neurocranium levation and mouth bottom depression, in 343
Helminth infection, population dynamics of acquired immunity to; experimental and natural transmission, 167
Hepatic elimination, on the relation between extended forms of the sinusoidal perfusion and of the convection-dispersion models of, 457
Herbs, perennial, optimal resource allocation and optimal size in, 33
HINES, W. G. S., Can and will a sexual diploid population evolve to an ESS: the multi-locus linkage equilibrium case, 1
HLA, an application to; the impact of symbolism on immunogenetics, 149
HOUSTON, A. I. and SUMIDA, B. H., Learning rules, matching and frequency dependence, 289
HSU, J.-P., Transient analysis of bacterial adhesion, 449
HSU, J.-P., A Monte-Carlo simulation of bacterial adhesion, 7
Hydropathic variability and functional properties of α-lactalbumins and type c lysozymes, relationship between, 91

Immunity, acquired, to helminth infection, population dynamics of; experimental and naural transmission, 167
Immunity, antibacterial, and its modeling in experimental tumor tetanus and wound tetanus of the mouse, 15
Immunogenetics, the impact of symbolism on; application to HLA, 149
Insulin kinetics and protein-deficient (malnutrition-related) diabetes mellitus (PDDM), a mathematical model, 491
Intake, *ad libitum* dry matter, by ruminants as regulated by distension and chemostatic feedbacks, modeling of, 407
IPIÑA, S. L., A multivariate phenetic approach to neuronal nuclei resemblances across species, with examples from three regions of cerebral cortex of a mammal, a bird and a reptile, 105

KACSER, H., Dominance not inevitable but very likely (letter), 505
KAWATO, M. (see URUSHIBARA, S.), 275

KENDAL, W. S. and FROST, P., Constancy of genomic instability in tumor progression (letter), 369
KEYMER, A. E. (see BERDING, C.), 167
KHARDORI, R. (see BAJAJ, J. S.), 491

Kinetics, insulin, and protein-deficient (malnutrition-related) diabetes mellitus (PDDM), a mathematical model, 491
KLINGLER, M. (see MEINHARDT, H.), 63

α-Lactalbumins and type c lysozymes, relationship between hydropathic variability and functional properties of, 91
LANDAU, G. M., VISHKIN, U. and NUSSINOV, R., An efficient string matching algorithm with K substitutions for nucleotide and amino acid sequences, 483
Learning rules, matching and frequency dependence, 289
Left-handed persons, male and female, contrasting sex ratios in siblings of (letter), 125
LIAO, J. C. and LIGHTFOOT, E. N. Jr, Extending the quasi-steady state concept to analysis of metabolic networks, 253
Ligand binding data, the use of non-linear regression analysis and the F test for model discrimination with dose-respose curves and, 183
LIGHTFOOT, E. N. Jr (see LIAO, J. C.), 253
LLOYD, M. M. (see LYSTER, W. R.), 125
LUTZ, H. U. (see MÜLLER-HEROLD, U.), 251
Lysozymes, type c, and α-Lactalbumins, relationship between hydropathic variability and functional properties of, 91
LYSTER, W. R. and LLOYD, M. M., Contrasting sex ratios in siblings of male and female left-handed persons (letter), 125

MCARTHUR, A. J., Thermal interaction between animal and microclimate: a comprehensive model, 203
MCGINLAY, P. B. (see BARDSLEY, W. G.), 183
Mammal, cerebral cortex of, and neuronal nuclei resemblances across species, 105
Matching, learning rules and frequency dependence, 289
Matching, string, algorithm, with K substitutions for nucleotide and amino acid sequences, 483
Mechanochemistry of diatom gliding motility, implictions of a retaliatory role for algal projectiles, 419
MEINHARDT, H. and KLINGLER, M., A model for pattern formation on the shells of molluscs, 63
MENÉNDEZ-ARIAS, L., TURNAY, J., GAVILANES, J. G. and RODRÍGUEZ, R., Relationship between hydropathic variability and functional properties of α-lactalbumins and type c lysozymes, 91
MERCOLA, D., The proto-oncogene *c-fos* encodes a potential regulatory site that is disrupted by viral transfuction (letter), 243
Metabolic networks, extending the quasi-steady state concept to analysis of, 253
Microbial protein supply to the host ruminant animal, reassessment of the contribution of protozoa to, 335
Microclimate and animal, thermal interaction between; a comprehensive model, 203
Molluscs, a model for pattern formation on the shells of, 63
Monte-Carlo simulation of bacterial adhesion, 7
Motility, gliding, diatom, mechanochemistry and implictions of a retaliatory role for algal projections, 419
Mouse, antibacterial immunity and its modeling in experimental tumor tetanus and wound tetanus of, 15
Mouth bottom depression in bony fishes (Halecostomi), optimization principles applied to the mechanism of neurocranium levation and, 343
MULLER, M., Optimization principles applied to the mechanism of neurocranium levation and mouth bottom depression in bony fishes (Halecostomi), 343

MÜLLER-HEROLD, U., LUTZ, H. U. and KEDEM, O., Quantum mechanical coherence in red blood cells: no experimental evidence (letter), 251
MURRAY, J. D. (see BERDING, C.), 167

NAKAZAWA, K. (see URUSHIBARA, S.), 275
Networks, metabolic, extending the quasi-steady state concept to analysis of, 253
Neurocranium levation and moth bottom depression in bony fishes (Halecostomi), optimization principles applied to the mechanism of, 343
Neuronal nuclei resemblances across species, a multivariate phenetic approach, with examples from cerebral cortex of a mammal, a bird and a reptile, 105
Nucleotide and amino acid sequences, an efficient string matching algorithm with K substitutions for, 483
NUSSINOV, R. (see LANDAU, G. M.), 483
Nussinov's compilation of eukaryotic transcription initiation sites (letter), 373

Oxygen storage by haemoglobin, a model, 437

Pattern formation on the shells of molluscs, a model, 63
Peak shifts in a founder population, the probability of, 51
PERELSON, A. S. (see BRENDEL, V.), 247
Perennial herbs, optimal resource allocation and optimal size in, 33
Perfusion, sinusoidal, and the convection-dispersion models of hepatic elimination, on the relation between, 457
Plants, temperature dependence of dormancy breaking in; computer simulation of processes studied under controlled temperatures, 309
PONDS, K. R. (see FISHER, D. S.), 407
Population, diploid, sexual, can and will it evolve to an ESS: the multi-locus linkage equilibrium case, 1
Population dynamics of acquired immunity to helminth infection: experimental and natural transmission, 167
Population, founder, the probability of peak shifts in, 51
Population, structured, dynamics, the occurrence of time-persistent distribution functions in (letter), 239
Protein supply, microbial, to the host ruminant animal, reassessment of the contribution of protozoa to, 335
Protein-deficient (malnutrition-related) diabetes mellitus (PDDM), a mathematical model for insulin kinetics and its application to, 491
Proto-oncogene c-*fos* encodes a potential regulatory site that is disrupted by viral transduction (letter), 243
Protozoa, reassessment of their contribution to the microbial protein supply to the host ruminant animal, 335
PUGLIESE, A., Optimal resource allocation and optimal size in perennial herbs, 33

Quantum mechanical coherence in red blood cells: no experimental evidence (letter), 251
Quasi-steady state concept, extension to analysis of metabolic networks, 253

RAO, G. S. (see BAJAJ, J. S.), 491
RAO, J. S. (see BAJAJ, J. S.), 491
Red blood cells, quantum mechanical coherence in; no experimental evidence (letter), 251
Regulatory site, disrupted by viral transduction, is encoded by the proto-oncogene c-*fos* (letter), 243
Reptile, cerebral cortex of, and neurol nuclei resemblances across species, 105
Resource allocation, optimal, and optimal size in perennial herbs, 33
